Jakub Wawrzynowicz

Full-Stack Software Engineer · Java, Spring Boot, Next.js

Zielona Góra, Poland · kubabundz@gmail.com · +48 880 156 420 · github.com/qbiterv · linkedin.com/in/jakub-wawrzynowicz-964038244 · qbiter.xyz

PROFILE

Full-stack engineer shipping complete products with Java, Spring Boot, PostgreSQL and Next.js. Founder of zoocompany, whose first product, zoogames, runs web stores for Minecraft servers. Freelancing since 2023, from an e-book platform built single-handedly to a Discord bot serving 200,000+ users.

EXPERIENCE

Founder & Lead Software Engineer

2026 to Present

zoocompany · zoocompany.xyz · Zielona Góra, remote

- Founded a product studio building SaaS tools for businesses; I own architecture, development and launch.
- **zoogames (live)** store platform for Minecraft servers on Spring Boot, Redis, Docker, S3 and Next.js; a Spigot API plugin delivers purchases to Paper, Spigot, Purpur, Velocity and BungeeCord with automatic retries.
- BLIK, bank transfer, paysafecard, SMS and card payments; LuckPerms, creator codes, coupons, ban appeals; Free, Pro and Network plans.
- **Own products** zooplay.gg, a Minecraft network; Skumasz (skumasz.pl), a course platform for the INF.03 and INF.04 exams; Budżet klasowy, a class budget app for teachers.
- **In development** payments, an ERP for small businesses and OAuth 2.0 auth.

Freelance Full-Stack Developer

Jan 2023 to Present

Independent contractor · Remote

- **Lody Ciao** (2026 to present) restaurant-management PWA for an ice-cream parlor with real-time POS integration, inventory and loyalty points; REST API with JWT and RBAC, Next.js, CI/CD.
- **Ecommind** (Jun 2025 to Jan 2026, part-time) e-book store built single-handedly: Spring Boot, PostgreSQL, PDF watermarking, one-time email login, S3 storage, Next.js and React.
- **GRE-WA** (Aug 2026) website and CRM for a construction company: client management and calendar; Next.js, CI/CD; design by suzidesign.
- **TuneBot** (Jan 2023 to Jun 2024) rebuilt the backend of a Discord music bot with 200,000+ users; real-time WebSocket control panel, admin panel, streaming integrations.

Software Engineering Intern

Mar 2025 · Nov to Dec 2025

ShipStation (Auctane Poland) · Zielona Góra

- **Nov to Dec 2025** developed and optimized a live product in Java and Spring Boot: algorithms, performance, debugging and testing in a team.
- **Mar 2025** built a food-ordering system with a Spring backend and a React (Vite) frontend.
